-

## FACTORS

Factors are the key conclusions about your credit data that had the most positive and negative impact on your credit score.

|                                                                                                                                                                                                     | Equifax | TransUnion | Experian |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|------------|----------|
|  <b>You've recently been paying your bills on time.</b>                                                             | ✓       | -          | -        |
|  <b>You have a sufficient number of accounts that are currently paid as agreed.</b>                                 | ✓       | -          | -        |
|  <b>You have a serious delinquency (60 days past due or greater) or derogatory indicator on your credit report.</b> | ✓       | -          | -        |
|  <b>You've made heavy use of your available revolving credit.</b>                                                 | ✓       | -          | -        |
|  <b>You have past due amounts on your accounts.</b>                                                               | ✓       | -          | -        |
|  <b>You have a short credit history.</b>                                                                          | ✓       | -          | -        |

RISK RATE

Risk rate is the likelihood people in this score range will get into serious credit trouble in the future.

| Equifax | TransUnion | Experian |
|---------|------------|----------|
| 25%     | N/A        | N/A      |

Most lenders would consider consumers with a score of **637** to be medium-high risk because approximately 25% of consumers in this score interval get into serious credit trouble.
